

Big Data

Will Hogan
4th Year Software Development
Research Methodologies in Computing and I.T.

Abstract—In modern day computing, the term Big Data has become increasingly popular and equally significant. In a nutshell, it's a term that's used to describe large amounts of data. This Data is being created and stored on a massive scale globally. The purpose of this literary review is to delve into the world of Big Data and ascertain where it's used, why organisations want it and where it fits into our modern day society, ie
